## Get new and enhanced features

### Drawing History

See changes made to your drawing over time. Get automatic insights by comparing previous versions right within the context of your current drawing.

### Xref Compare

Compare two versions of an external reference file (Xref) and implement changes without leaving your current drawing.

### Blocks palette enhancements

Stay connected to your block content—anytime, anywhere. Insert blocks efficiently from the Libraries tab on desktop or in the AutoCAD web app.

### Graphics performance improvements

Pan and zoom faster in real time. When panning and zooming in 2D, AutoCAD automatically performs regeneration operations for a faster and smoother experience. 3D orbit, pan, and zoom operations are also more responsive, due to multi-core processors.

### AutoLISP enhancements

Edit and debug AutoLISP files using the new extension for Microsoft Visual Studio Code. AutoLISP now fully supports Unicode characters.

### Cloud storage connectivity

Open any DWG file with leading cloud storage providers, as well as from Autodesk Drive included with your subscription.

### Speed improvements

Save your work in only a fraction of a second. Install AutoCAD in half the usual time for solid state hard drives.

### Trim and Extend

Trim and Extend has become more streamlined – the default Quick mode now automatically selects all potential boundaries.

### Quick Measure improvements

The Quick option of the MEASUREGEOM command now shows the calculated values for areas and perimeters in a 2D drawing.

### Revcloud enhancements

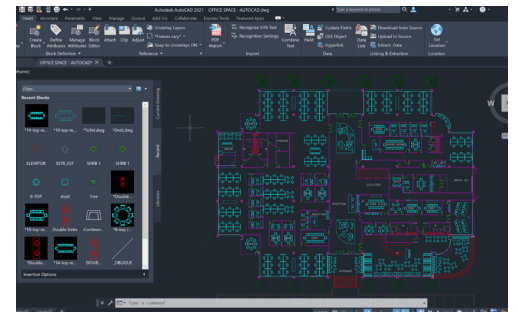

Change the arc size for any revision cloud with the new REVCLLOUDPROPERTIES command.

### Break Objects at a Single Point

Separate a line, arc, or open polyline into two objects at a point you select, using the new BREAKATPOINT command.

### Protect your designs with TrustedDWG technology

Help retain the integrity of your design data throughout the review process with TrustedDWG™ technology. Built into AutoCAD software, TrustedDWG is the original, most efficient, and most accurate way to store and share design data.
